

## Sams Nuts Store opening

Sams nuts store is opened last friday in my city. This store has a very **Large** amount of goods. The store is very big and has a lot of rows, in which the goods are stored. Sams nuts sells almost all of roasted nuts you can think of. Plus the prices beat all the competition in the city.

The owner of the store told me "never open a store without having income higher than the outcome". I think he meant i should have enough money to operate a store in order to open one. People refer to the owner of the store as rookie, but his actual name is **Ryan Camrag**. i really enjoyed visiting the store, and getting to know how he runs his job. I think the store will probably grow to be regional if not global.
